Summary

Help Desk Analyst moving into cloud operations, with hands-on AWS work and enterprise IT support experience. At Spechy I set up and maintained around 10 Amazon EC2 Linux instances running a CRM platform. My portfolio site, baris.hu, runs on S3, CloudFront, Route 53, ACM and AWS WAF, with its infrastructure imported into and managed with Terraform. Looking for CloudOps and junior cloud engineering roles.

Skills

Area	Skills
AWS	EC2, S3, CloudFront, Route 53, ACM, AWS WAF, CloudWatch, AMIs, VPC fundamentals, AWS CLI
Infrastructure as Code	Terraform (importing existing resources, remote S3 state), Git, GitHub
Linux and systems	Linux server administration, SSH, performance monitoring (top, htop), FTP, Bash (learning)
Service operations	Incident handling, ticket prioritisation, escalation, troubleshooting documentation
Product and business	Requirements gathering, backlogs, stakeholder communication, operations management

Project

baris.hu: bilingual CV website on AWS, managed with Terraform (Mar 2026 – present) · baris.hu · code on GitHub

- Serves the site from a private S3 bucket through Amazon CloudFront with Origin Access Control; HTTPS via ACM, DNS in Route 53, AWS WAF in front.

- Built first in the console, then imported the existing resources into Terraform without recreating them.
- Keeps Terraform state in a separate S3 bucket with encryption, versioning and public access blocked.

Experience

Help Desk Analyst, Tata Consultancy Services · Budapest, Hungary (hybrid) · Jan 2025 – present

- Support enterprise users with application, access, device and connectivity issues.
- Investigate incidents, document troubleshooting steps and keep users updated on progress.
- Prioritise tickets against service requirements and coordinate escalations with specialist teams.

Operations Manager / Founder, Ekinciler Kft. · Budapest, Hungary · Jul 2022 – Nov 2024

- Founded and ran the business, coordinating daily operations, suppliers and staff.
- Balanced operating costs, service quality and business priorities.

Product Manager, Epigra · Istanbul (remote) · Sep 2021 – Apr 2022

- Coordinated five product projects, translating customer requirements into technical backlogs and documentation.
- Worked with engineering teams and stakeholders to clarify priorities and support delivery.

Cloud Infrastructure Associate (CloudOps), Spechy · Istanbul · Mar 2021 – Sep 2021

- Set up and maintained around 10 Amazon EC2 Linux instances running the company's CRM application, within an existing VPC.
- Monitored CPU and memory with Amazon CloudWatch and directly on the servers over SSH (top, htop); investigated performance issues and adjusted instance and application configuration.
- Created custom AMIs and used them to provision new instances consistently.
- Backed up application files to Amazon S3 and managed FTP-based file transfers.

Customer Support Specialist, Tempo BPO · Batman · Jun 2019 – Feb 2020

- Handled customer service and technical enquiries in English; clarified problems, explained solutions and documented issues for follow-up.

Certifications

- AWS Certified Solutions Architect – Associate (SAA-C03), Amazon Web Services · Sep 2026, valid until Sep 2029
- AWS Partner: Forward Deployed Engineer (FDE) – Validated, Amazon Web Services · Nov 2026
- Google IT Support Professional Certificate, Google · Dec 2020
- AI Fluency: Framework and Foundations, Anthropic · Oct 2026
